

Syllabus for the First Degree Programme in Mathematics
of the University of Kerala

Semester VI
Project

Code: MM 1646

No. of credits: 4

As part of the programme, there shall be a project carrying 4 credits. The aim of the project is to bring out research talents in the students and to introduce research methodology. The theme of the project may be chosen from any branch of Mathematics as an extension of the theory covered during the various semesters.

The project shall be done individually or in groups of a maximum of five students. The topics for the project are to be identified during the fourth semester with the help of the supervising teacher. The report of the project shall be submitted in duplicate to the Department by the end of the sixth semester well before the commencement of the examination. The reports are to be produced before the external examiners appointed by the University for evaluating the project.
